## Products

### Circuit Breaker Testing

Makers of circuit breakers carry out rigorous evaluations to certify their products' quality and effectiveness before it hits the market. These evaluations include assessing the strength of insulation and integrity of contact resistances, which are critical for safety and performance.

### Traction and Induction Motor Testing

In an effort to ensure the utmost performance and reliability of traction motors, they must undergo rigorous testing under diverse conditions. These

## Featured Products

### MVT 200B and 200B+

The MVT 200B series contact resistance meters are a cutting-edge line of highly portable, lightweight, and user-friendly devices that measure resistances in diverse test objects, including Circuit Breakers, Isolators, Disconnectors, Bus-Bars, Joints, and more. By injecting current up to 200 A through the device under test, these meters accurately measure micro-ohm resistances, even in noisy switchyard conditions, making them an ideal preventive maintenance tool for assessing critical resistances.

## About Us

### Powering reliability with expert engineering & diagnostics

Crest Test Systems, founded in 2009, specializes in innovative test and measurement solutions for circuit breakers, induction motors, and traction motors.

Our versatile product offerings cater to on-field and OEM testing requirements, enabling preventative maintenance, troubleshooting, and commissioning while assisting clients in increasing efficiency, reducing costs, and prolonging equipment life.

## Global Presence

Crest Test Systems has established a significant global presence, reflecting our commitment to serving industries worldwide with ingenious testing and measurement products. From our home base in India, our reach extends across diverse geographies and thriving industrial landscapes, including Qatar, Saudi Arabia, Vietnam, Indonesia, Malaysia, China, Turkey, Australia (Sydney), the United Kingdom, South Africa, Switzerland, and Brazil. This extensive international network enables our clients' unparalleled access to cutting-edge technologies, ensuring we continue to innovate and provide the highest quality products and services.

## How can we help you?

### I'm Interested In...

- Product benefits
- Supporting documents
- Partnership
- Product support
- Software support
- Spares
- Logistics partner
- RM supplier
- A Job
